

Olumuyiwa David Ogunniyi

Full-Stack Developer

Greater Toronto Area, Canada | rashydavids@gmail.com | (437) 552-6807 | linkedin.com/in/olumuyiwa-ogunniyi-09149890 | github.com/Kingdavids | tech.muyiwadavids.com

SUMMARY

Full-stack developer with a background in web development, system administration, and application design. Builds production systems in Angular, React, TypeScript, Spring Boot, and Node.js, with hands-on experience in database modeling, Linux service configuration, and cloud infrastructure across AWS, Azure, Docker, and Terraform.

EXPERIENCE

- Software Product Engineer — Averil**

Sep 2025 – Present

Ontario / Remote

 - Work across the stack: responsive web interfaces, backend integrations, and the deployment pipeline, on a small cross-functional product team.
 - Turn product requirements into features that hold up over time, paying attention to usability, data flow, and reliability once they're live.
- AI Coding Evaluator (Contract) — DataAnnotation**

Jun 2026

Remote

 - Reviewed coding-agent output for systems including Codex and Claude Code, checking for correctness and whether the agent did what it was asked.
 - Flagged implementation problems, compared competing solutions, and wrote feedback aimed at improving the model, past a simple right-or-wrong mark.
- AI Coding Evaluator (Contract) — G2i**

May 2026

Remote

 - Evaluated coding-agent output and developer interactions for systems like Codex and Claude Code, checking correctness, instruction-following, and explanation quality.
 - Applied engineering judgment to catch implementation issues, weigh solutions against each other, and write feedback specific enough for the model to learn from.
- Media-TechOps / DevOps Intern — Gemeaux World Global Resources**

Aug 2024 – Aug 2025

Montréal / Remote

 - Supported the company's media-technology infrastructure through DevOps, site reliability, and security-focused operational work.
 - Worked with product and infrastructure stakeholders to keep services deployment-ready and operations running dependably.

SELECTED PROJECTS

- Royalway Space Rental Platform — space.royalwaycc.org**

2026

 - Solo-built venue-booking platform for a private event hall using Next.js, MySQL, and Stripe. Live and processing real bookings and payments.
 - Built an interactive layout visualizer, a real-time pricing calculator, and automated confirmation emails.
- Jigzack Waste Management Platform — Next.js / Supabase / PostgreSQL**

2026

 - Role-based SaaS for a waste disposal company with separate customer, employee, and admin portals covering signup, billing, and operations.
- Spring Security Project Series — Spring Boot / Spring Security / Java**

2026

 - Six backend projects covering role-based access control, HTTPS/TLS hardening, session cookie security, and independently deployable REST microservices.
- Tech Portfolio — tech.muyiwadavids.com**

2026

 - Production Angular 19 site with server-side rendering, used as a live testbed for real production debugging, including a CloudFront caching bug and a mobile memory leak.

SKILLS

Languages / Frameworks	Angular, React, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS
Backend	Node.js, Express.js, Java, Spring Boot, Spring Security, SQL, PostgreSQL, MySQL
Cloud / DevOps	AWS, Azure, Docker, Terraform, CI/CD
Systems	Linux Administration, Networking, Service Configuration
Tools	Git, Jira, Linear, Slack

EDUCATION

- Advanced Diploma in Computer Programming — Sheridan College**
- Jan 2023 – Sep 2026
