

OLUMUYIWA DAVID OGUNNIYI

Ontario, Canada | +1 (437) 552-6807 | muyiwadavids.dev@gmail.com | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building production web applications, AI-powered products, cloud-integrated systems, and modern frontend experiences. Skilled across TypeScript, JavaScript, React, Next.js, Python, FastAPI, Node.js, and relational and NoSQL databases.

Hands-on experience developing responsive user interfaces, REST APIs, backend services, database models, and cloud-connected applications. Comfortable working across the software development lifecycle, from translating product requirements into technical implementations to improving application performance, accessibility, maintainability, and user experience.

PROFESSIONAL EXPERIENCE

Averil, Toronto, ON

09/2025 - Present

Software Engineer, AI

Stack: TypeScript, JavaScript, React, Next.js, Python, FastAPI, PostgreSQL, AI/LLM Technologies

- Contribute to the development of Averil's AI-powered product experiences, working across application functionality, backend services, and user-facing features.
- Build and maintain full-stack functionality across modern JavaScript/TypeScript applications and Python-based backend services.
- Support the integration of AI capabilities into product workflows, helping transform application requirements into usable product features.
- Collaborate across product and engineering to improve application architecture, reliability, maintainability, and overall user experience.

Cloud Enthusiast Hub, Montreal, QC

08/2024 - 08/2025

Software Engineer

Stack: React, TypeScript, Tailwind CSS, Material UI, JavaScript, REST APIs, Cloud Services

- Built responsive frontend experiences for Foto-C and internal media-technology dashboards using React, TypeScript, Tailwind CSS, and Material UI.
- Integrated frontend components with backend and cloud services supporting media-processing and analytics workflows.
- Developed reusable UI components and contributed to application design systems, improving consistency and maintainability across product interfaces.
- Improved usability through accessibility enhancements, responsive design, UI/UX refinements, and frontend performance optimization.
- Partnered with product stakeholders to translate requirements into intuitive user flows and interactive application experiences.

Techsity, Toronto, ON

08/2023 - 07/2024

Software Engineer

Stack: React, TypeScript, Tailwind CSS, Material UI, JavaScript, REST APIs, Cloud Services

- Contributed to the development of LobeStack, an AI-powered marketing intelligence platform that helps businesses research their brands, generate marketing content, schedule campaigns, and analyze performance across digital channels.

- Built and maintained full-stack product features using Next.js, TypeScript, Node.js, and PostgreSQL, working across user-facing workflows and backend services.
- Developed reusable frontend components and application flows for marketing workflows, improving consistency and maintainability across the platform.
- Integrated frontend experiences with backend APIs and third-party services supporting content generation, campaign management, and social media workflows.
- Collaborated with product and engineering stakeholders to translate product requirements into production-ready features and improve the overall platform experience.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript.

AI & ML Engineering: LLM integration (OpenAI, Anthropic Claude), RAG (Retrieval-Augmented Generation), Agentic AI, tool and function calling, Vector search, Embeddings, Semantic retrieval, Two-tower retrieval models, Prompt engineering, Evaluation pipelines

Frameworks: FastAPI, Pydantic, Node.js, Nest JS, Express.js, React JS, Next.js, Redux, Zustand.

API: GraphQL, REST.

Cloud Platforms: Amazon Web Services (Amplify, EC2, SES).

Databases: MySQL, PostgreSQL, DynamoDB, Redis.

Test Driven Development: Jest, Mocha.

DevOps: GitHub Actions, Jenkins, Docker.

Web Scraping: Selenium, Playwright, Puppeteer

EDUCATION

Advanced Diploma, Computer Programming
Sheridan College
